

Steven Luu

Education

B.A Computer Science - Rice University | GPA: 3.68

Relevant Courses: Data Structures, Concurrent Programming, Algorithms, Advanced Videogame Design

Professional Experience

Paycom — Software Developer II | *PHP, JavaScript, React*

June 2025 – May 2026

- Led **end-to-end development** as a sole engineer, designing, building, and deploying production features in a full-stack environment
- Designed and implemented a **Product Request Lead Tool**, centralizing all active leads and reducing navigation/lookup time by ~50%
- Enabled **batch and one-click reassignment workflows**, reducing lead reassignment time by ~70% and minimizing manual operations
- Automated lead management processes, reducing manual effort by ~50% and improving team efficiency
- Migrated legacy database tables to **new schemas** and optimized **SQL queries**, improving performance and data consistency
- Introduced **structured invalidation notes**, improving data transparency and reducing ambiguity in lead status decisions
- Leveraged **AI-assisted development tools** to accelerate delivery while maintaining high code quality

RCEL — Self-Driving Team Lead (Internship) | *JavaScript*

May 2023 – Aug 2023

- Led an **Agile team of 4 engineers**, managing sprint planning, standups, and stakeholder communication with industry partners
- Co-founded and developed **LiDAR-based robotic kits** demonstrating **Guidance, Navigation, and Control (GNC)** principles using **JavaScript**, enabling hands-on system simulation
- Applied **SLAM and Kalman filtering** concepts to model real-world autonomous navigation systems

Surge AI — Software Developer (Internship) | *Python*

Dec 2021 – Dec 2022

- Debugged and optimized **AI-generated Python code**, improving model accuracy and reliability
- Developed evaluation frameworks and contributed to **benchmark datasets for LLM performance**

Projects

Zwee's Star Jar (Mobile App) | *Python, Kivy*

May 2025 – Jun 2025

- Built mobile app with **multi-screen architecture** and **offline persistence (JsonStore)**
- Designed **randomized content delivery** and an optimized **audio system with playlist management**

PairFate (Multiplayer Game) | *C#, Godot Engine*

Dec 2023 – Aug 2024

- Led a **team of 5 developers** to build a networked multiplayer game
- Developed gameplay systems, enemy AI, and multiplayer mechanics
- Delivered a **playable, commercial-ready prototype** with multiple bosses and unique mechanics

Skills

Languages: Java, JavaScript, Python, PHP, SQL, C, C#, HTML/CSS

Frameworks/Tools: React, .NET, Docker, Kubernetes, Git, IntelliJ, Visual Studio

Other: Splunk, AI-assisted development tools
